Description:

This authoritative guide has introduced many tens of thousands of clinicians to Trauma-Focused Cognitive-Behavioral Therapy (TF-CBT), a leading evidence-based treatment for traumatized children and their parents or caregivers. Preeminent clinical researchers provide a comprehensive

framework for assessing posttraumatic stress disorder (PTSD), other trauma-related symptoms, and traumatic grief in 3- to 18-year-olds; building core coping skills; and directly addressing and making meaning of children's trauma experiences. Implementation is facilitated by sample scripts, case examples, troubleshooting tips, and reproducible client handouts. Purchasers get access to a Web page where they can download and print the reproducible materials in a convenient 8 1/2" x 11" size. TF-CBT is listed in SAMHSA's National Registry of Evidence-Based Programs and Practices.

New to This Edition

- *Incorporates a decade's worth of advances in TF-CBT research and clinical practice.
- *Updated for DSM-5.
- *Chapter on the model's growing evidence base.
- *Chapter on group applications.
- *Expanded coverage of complex trauma, including ways to adapt TF-CBT for children with severe behavioral or affective dysregulation.

See also the edited volume *Trauma-Focused CBT for Children and Adolescents: Treatment Applications* for more information on tailoring TF-CBT to children's varying developmental levels and cultural backgrounds.
