News from the Société Mathématique de France

Stéphane SEURET
EMS president’s meeting
Berlin, March 23-24 2019
The Centre international de Conférences Mathématiques in Marseille is expanding:

- ~ 25 new rooms
- A larger restaurant.
- One new conference room (~ 100 seats).
- New small meeting rooms.

Two large events organized simultaneously, starting 2020 (a bit this year in practice)
Extension of the CIRM

The Centre international de Conférences Mathématiques in Marseille is expanding:

- ~ 25 new rooms → open tomorrow!
- A larger restaurant → open in April!
- One new conference room (~ 100 seats) → open in July!
- New small meeting rooms.

Two large events organized simultaneously, starting 2020 (a bit this year in practice)

- ~ 25 new rooms — open tomorrow!
- A larger restaurant — open in April!
- One new conference room (~ 100 seats) — open in July!
- New small meeting rooms.

Two large events organized simultaneously, starting 2020 (a bit this year in practice)

SMF and SMAI have proposed to host the next EMS President’s meeting next year.

Be prepared to discover a brand new CIRM in 2020!
Saint Petersburg was chosen - Congratulations to Russia!

France is preparing an application for organizing the ICM in 2026 in Paris, focusing on:

- Maths and society
- Maths and education
- Maths and their applications
- New horizons for mathematics
- Mathematics and developing countries
Digital transformation of the SMF

After 2.5 years of intensive work, the SMF has achieved its digital transformation:

- New and updated databases
- New way of organizing its publications (5 journals, ≥ 5 book collections)
- New website (not only prettier, much more efficient)

With other learned societies **AND NOT ONLY IN MATHS**, we are working together to

- organize wide consultations of researchers
- give more credit to science and maths in particular in the media
- write common positions on government’s proposals for teaching and research

**Concrete effects:**

→ Positions on new programs in French high schools, where a poor place is left to maths.
→ National consultation of French researchers on their expectations
→ A credible position in the discussion with politicians and decision makers (we represent ≥ 40,000 researchers).
